

### **alkalinity carbonate and bicarbonate pdf**

Alkalinity is the capacity of water to resist changes in pH that would make the water more acidic. ( It should not be confused with basicity which is an absolute measurement on the pH scale.) Alkalinity is the strength of a buffer solution composed of weak acids and their conjugate bases. It is measured by titrating the solution with a monoprotic acid such as HCl until its pH changes abruptly ...

Sodium bicarbonate (IUPAC name: sodium hydrogen carbonate), commonly known as baking soda, is a chemical compound with the formula  $\text{NaHCO}_3$ . It is a salt composed of sodium ions and bicarbonate ions. Sodium bicarbonate is a white solid that is crystalline but often appears as a fine powder. It has a slightly salty, alkaline taste resembling that of washing soda (sodium carbonate).

Armand Products Company Handbook  $\text{KHCO}_3$  5 Discover the Versatility of Potassium Bicarbonate  
tClassified by the FDA as a food ingredient - generally recognized as safe (GRAS)  
tA strong buffer with mild alkalinity  
tLess caustic than carbonates and hydroxides  
tGentle reactivity for controlled neutralization  
tThermal stability up to 350°F  
tWater soluble  
tDissolves quickly
