It used to be that to diagnose an illness, interpret legal documents, analyze foreign policy, or write a newspaper article you needed a human being with specific skills—and maybe an advanced degree or two. These days, high-level tasks are increasingly being handled by algorithms that can do precise work not only with speed but also with nuance. These “bots” started with human programming and logic, but now their reach extends beyond what their creators ever expected.

### **Automate This How Algorithms Came To Rule Our World**

Algorithms have been around for most of recorded human history. Even basic math such as multiplying two numbers involves the use of an algorithm’s “specific steps” that will always produce the same outcome for the same two numbers. The Pythagorean Theorem from ancient Greece, still taught to every high-school student, is an algorithm. But although algorithms are not new, they were put on ...
