The uranium market, like all commodity markets, has a history of volatility, moving not only with the standard forces of supply and demand, but also to whims of geopolitics.It has also evolved particularities of its own in response to the unique nature and use of this material. Historically, uranium has been mined in countries willing to export, including Australia and Canada.

Bacterial conjugation is the transfer of genetic material between bacterial cells by direct cell-to-cell contact or by a bridge-like connection between two cells. It is a mechanism of horizontal gene transfer as are transformation and transduction although these two other mechanisms do not involve cell-to-cell contact.. Bacterial conjugation is often regarded as the bacterial equivalent of ...
