We assemble a full line of specialized hoses and fittings, including hydraulic hose, water hose, flexible hose, special application hose, and braided hose. JGB Enterprises has long standing relationships with over 1500 vendors.

Hydraulic Hose & Fittings - JGB Featured Markets - JGB

A hose coupling is a connector on the end of a hose to connect (or couple) it with another hose or with a tap or a hose appliance, such as an irrigation sprinkler. It is usually made of steel, brass, stainless steel, aluminium or plastic.. Due to the great variety of the designs and the number of countries in which they were created, it is difficult to trace the origin of many.

Ermeto DIN Male Stud High Pressure Hydraulic Tube Fittings. The main function of Ermeto DIN male stud high pressure hydraulic tube fittings is to connect different numbers of tubes and hoses.

PARKER ERMETO TUBE FITTINGS - Ermeto Hydraulic Tube

Hydraulic machines are machinery and tools that use liquid fluid power to do simple work. Heavy equipment is a common example.. In this type of machine, hydraulic fluid is transmitted throughout the machine to

various hydraulic motors and hydraulic cylinders and becomes pressurised according to the resistance present. The fluid is controlled directly or automatically by control valves and ...

Hydraulic machinery - Wikipedia

When the Coupling Nut is progressively tightened it makes the Progressive Ring to move on to the tube which subsequently makes two bites into the outside diameter of the pipe, thereby forming a visible collar of material at 1, ensuring a strong, reliable, high degree of safety and permanent sealing due to the outstanding construction & design of our progressive ring.
