In logic, a set of symbols is commonly used to express logical representation. As logicians are familiar with these symbols, they are not explained each time they are used.

### **List of logic symbols - Prof. Jacson Rodrigues**

The right side is considered the intuitive or spontaneous side, while the left side is logical. Knowing an individual's brain dominance can help you understand his/her "ways" of thinking, behaving,

### **Right Brain vs. Left Brain " What's the Difference?**

Fallacies are statements that might sound reasonable or true but are actually flawed or dishonest. When

readers detect them, these logical fallacies backfire by making the audience think the writer is (a) unintelligent or (b) deceptive.
