3 LiDAR Platforms aerial - for highly detailed, local elevation data satellite - covers large areas with less detail
LIDAR Operational Theory A pulse of light is emitted and the precise time is recorded. The reflection of that pulse is detected and the precise time is recorded.

Light Detection and Ranging (LiDAR)

Nanophotonics or nano-optics is the study of the behavior of light on the nanometer scale, and of the interaction of nanometer-scale objects with light. It is a branch of optics, optical engineering, electrical engineering, and nanotechnology. It often (but not exclusively) involves metallic components, which can transport and focus light via surface plasmon polaritons.

The Marine Science major was revised in 2015, and changes will come into effect for 2016. Students taking the Marine Science major who commenced the program in 2015 and who have not taken MARI2300 and MARI2320 will be transitioned to the new program structure and will be required to take MARI1000 as a compulsory course in the Marine Science major.

General statement. Safety is our licence to operate. The Air Liquide Group adheres to the highest standards in conducting business and is particularly committed to respecting human and labor rights and to protecting the environment.

Group's Principles of action | Air Liquide

In response to a very different moral dilemma in the 1970s, the Sullivan Principles were developed to help investors and companies by providing a practical set of guidelines on how to engage with ...

New principles to guide corporate investment towards

Photomultiplier tubes (photomultipliers or PMTs for short), members of the class of vacuum tubes, and more specifically vacuum phototubes, are extremely sensitive detectors of light in the ultraviolet, visible, and near-infrared ranges of the electromagnetic spectrum. These detectors multiply the current produced by incident light by as much as 100 million times (i.e., 160 dB), in multiple ...

Introduction to Optical Microscopy provides a rigorous and comprehensive overview of the fundamentals of optical microscopy. Starting from basic principles in Fourier optics, partial coherence, 3D imaging theory, and the physics of scattering and fluorescence, Introduction to Optical Microscopy explores a broad range of microscopy techniques.

LYON, France – November 23, 2017: The 2016 horticultural lighting market (i.e. system level) represented a business of about US\$3.1 billion, which should grow to approximately US\$3.8 billion in 2017. The current business is mostly driven by greenhouse applications and incumbent technologies, representing respectively 92% and 79% (in revenue) of the total market in 2017.
