6 Chemistry Physical Chemistry: Basic principles and applications of quantum mechanics, angular momentum, hydrogen atom, atomic structure, chemical bonding,

Admission Brochure for PhD Admission Test: First Semester

Chemistry is the scientific discipline involved with compounds composed of atoms, i.e. elements, and molecules, i.e. combinations of atoms: their composition, structure, properties, behavior and the changes they undergo during a reaction with other compounds. Chemistry addresses topics such as how atoms and molecules interact via chemical bonds to form new chemical compounds.

Chemistry - Wikipedia

Fluorine is a chemical element with symbol F and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions. As the most electronegative element, it is extremely reactive: almost all other elements, including some noble gases, form compounds with fluorine.. Among the elements, fluorine ranks 24th in universal abundance and 13th in ...
