

the software requirements memory pdf

A software requirements specification (SRS) is a description of a software system to be developed. It is modeled after business requirements specification, also known as a stakeholder requirements specification (StRS). [citation needed] The software requirements specification lays out functional and non-functional requirements, and it may include a set of use cases that describe user ...

To be used efficiently, all computer software needs certain hardware components or other software resources to be present on a computer. These prerequisites are known as (computer) system requirements and are often used as a guideline as opposed to an absolute rule. Most software defines two sets of system requirements: minimum and recommended.
